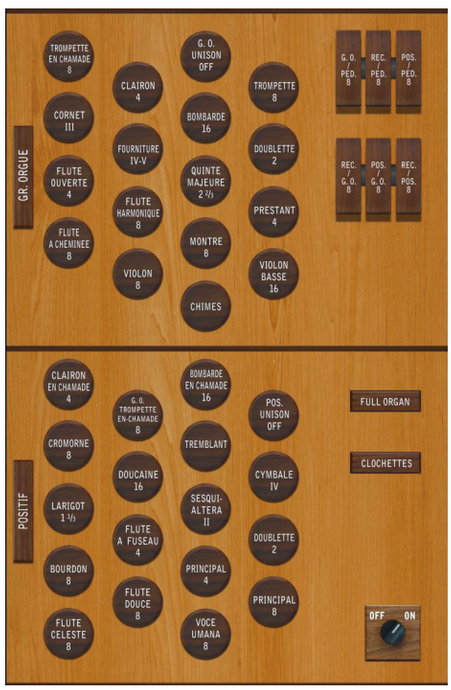
Casavant

Bellvue, Washington

Casavant Frères (Casavant Brothers) is Canada's best-known organ building firm. Acoustics in America tend to be on the drier side (especially when compared with Europe) and the tonal and voicing design of Casavant organs takes this into consideration. Across its three manuals and pedal, Op. 3742 provides the typical resources useful for American service playing, beginning with the core principal chorus on the Great to support congregational singing. Two enclosed/expressive divisions with both foundation and color stops are especially useful for choral accompanying. Beyond the basics of each division, additional elements such as the horizontal Trompette-en-chamade and the Chimes are also typical of many American church organs of this size.



Pedal

Soubasse	32
Bourdon	32
